

Practical No 3

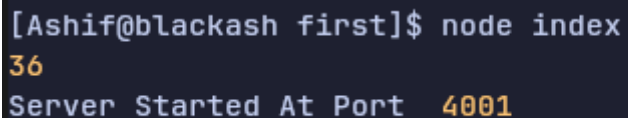

AIM: Write a program to demonstrate creating module and using module export or require.

add.js

```
export const addNumber = (num1, num2) => {  
  return parseInt(num1) + parseInt(num2)  
}
```

index.js

```
const http = require("http")  
const { addNumber } = require("./add")  
  
const app = http.createServer((req, res) => {  
  res.write("This Is Home Page")  
  res.end()  
})  
  
console.log(addNumber(12, 24))  
  
app.listen(4001, () => {  
  console.log("Server Started At Port ", 4001)  
})
```

```
[Ashif@blackash first]$ node index  
36  
Server Started At Port 4001
```
